**LEAD-FREE
CRYSTAL GLASS**

Why f&d Glass?

There are two main reasons for Paşabahçe in developing the f&d glass and f&d brand:

- Creating a product that is produced automatically by machines but has the fineness, brilliance, perfect clarity and transparency of hand-made products,
- As well as the properties mentioned above, creating a product range that is dishwasher safe for more than 2.000 cycles.

Aiming to reach these two main objectives and to determine the glass composition to be lead free crystalline, Şişecam (Paşabahçe) started an intensive R&D project at Glass Research Center of Şişecam.

It was found out that the glasses that do not have high chemical resistance are getting corrosion under bad keeping conditions; and such glasses are being scratched after machine-washing. In the direction of this important finding, the glass composition of f&d were developed to resist to such bad keeping conditions.

After the spectrometric measures done at the laboratories of Glass Research Center of Şişecam, it was found that the f&d glass has a very high value of light transparency. Also, it was determined that the f&d glass has a washing machine durability of over 2.000 cycles according to the European Standard of EN 12875 norms.

On April 2007; Paşabahçe proudly introduced the new glass, and the new brand “f&d”, which has both very high transparency and washing machine durability, to the whole world as well as Turkey.

Neden f&d?

Cam Ev Eşyaları sektörüne yön veren, global ve yenilikçi Paşabahçe'nin f&d camını ve markasını yaratmasında iki temel neden bulunmaktadır.

- Yüksek üretim kapasitesine sahip makinelerle de, el imalatı camların sahip olduğu incelik, parlaklık ve yüzey düzgünlüğü özelliklerine sahip bir ürün gamı yaratmak,
- Bu ürünlerin ilk maddede belirtilen özelliklerin yanı sıra, yüksek bulaşık makinesi dayanımına da sahip olmasını sağlamak.

Bu iki temel amaç göz önünde bulundurularak “1969 AB Kristal Direktifi”ne göre Kristalin kategorisinde yer alacak ve kurşun ihtiva etmeyecek hedef cam kompozisyonu belirlenmiş, Şişecam (Paşabahçe) Cam Araştırma Merkezi'nde bu doğrultuda yoğun bir araştırma ve geliştirme çabası başlamıştır.

Cam ürünlerin yüzeyinde kötü stoklama / kötü kullanım koşulları gibi durumlarda oluşan ancak gözle görülemeyen bozulmalar nedeniyle ürünler bulaşık makinesinde yıkandıktan sonra bulutlanmalar görülebilmektedir. F&d cam kompozisyonu bu olumsuz durumu da önleyecek şekilde geliştirilmiştir.

Şişecam Araştırma Merkezi laboratuvarlarında yapılan spektrofotometrik ölçümler sonucunda f&d camının ışık geçirgenliğinin olabilecek en yüksek değerde olduğu, ayrıca Avrupa Standardı EN 12875 normlarına göre bulaşık makinesinde 2000 devir üzerinde yıkamaya dayanıklı olduğu belirlenmiştir.

Paşabahçe, Nisan 2007'de çok yüksek ışık geçirgenliğine ve bulaşık makinesi dayanımına bir arada sahip olan “f&d” markasının lansmanını Türkiye'de ve tüm dünyada büyük gururla yapmıştır.
