

Our smallest PLATE MATE is your **biggest help!**

THE WALL-MOUNT MODELS

The wall-mount PLATE MATE models are extremely suited to very small kitchens, take-away buffets in cafeterias, etc. Mounted side-by-side they are also suitable for storing trays.

The wall-mount model is available in five versions:

- WM 6: holds 6 plates, height 57 cm
- WM 9: holds 9 plates, height 77 cm
- WM 12: holds 12 plates, height 99 cm
- WM 18: holds 18 plates, height 141 cm
- WM 21: holds 21 plates, height 162 cm

The wall-mount models are fixed to the wall by a stainless steel bracket and can be detached, making them easy to move and clean. Separate brackets are available as an optional extra.

TABLE-TOP MODELS

The rotating column stands on a stainless steel foot with adjustable feet to compensate for any unevenness in the surface. Stainless steel swivel wheels, two of which have a brake, are available for an additional charge. All table models are equipped with a suspension eye at the top, making it possible to hang the rack in a cold store or use it as a wall model on a ship for example. All table models are equipped with a convenient hand grip as standard to make them easier to move.

WALL SUPPORT

A stainless-steel wall support accessory is available to convert the table model into a wall model by using the suspension eye. The column holding the plates can still be rotated.

The handy PLATE MATE table-top model is available in four versions:

- TM 12: holds 12 plates, height 49 cm
- TM 24: holds 24 plates, height 73 cm
- TM 36: holds 36 plates, height 93 cm
- TM 48: holds 48 plates, height 114 cm

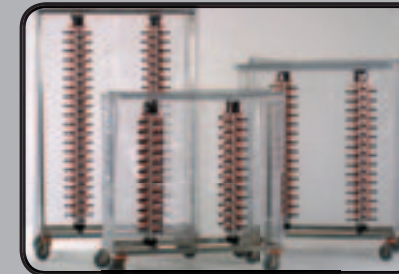

PM 168 TWIN
THE REAL
SPACE SAVER!

PLATE MATE TWIN MODELS

The PM 168 TWIN is the largest mobile plate rack in the PLATE MATE range. The columns can be rotated independently in the frame. The trolleys and swivel wheels, two of which have a brake, are made of stainless steel. All PLATE MATE columns are made of aluminium and plastic.

WARRANTY

PLATE MATE is patent protected in many countries. Our products carry a full one-year warranty.

The PLATE MATE TWIN model is available in three versions:

- PM 96 TWIN: holds 96 plates, height 138 cm
- PM 120 TWIN: holds 120 plates, height 158 cm
- PM 168 TWIN: holds 168 plates, height 186 cm

A protective cover is available for each TWIN model as an optional accessory to protect against odours and prevent the food from drying out.

PLATE MATE

FLEXIBLE

The internationally patented PLATE MATE system can accept any type of plate or bowl – round, square, rectangular or oval – up to 5 cm deep. Its grip is extremely secure and minimizes the chance of breakage.

It is simple to adjust by hand. There are four adjusting screws at the top of the PLATE MATE. By turning these screws you can adjust the distance between the red and black support caps so that you can place four different types of plates or bowls in your PLATE MATE at the same time.

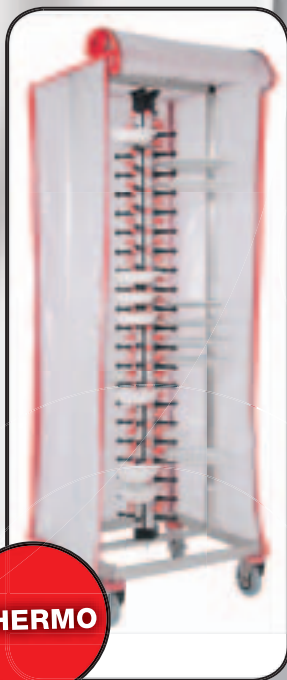

SAVE SPACE AND TIME

You can quickly and easily stack a large number of plates with semi-prepared or ready-to-serve products in an extremely small space, making it simple to place in a cold store or hotbox. Afterwards you serve from the PLATE MATE, saving a lot of time and making the work more pleasant.

MAINTENANCE

A PLATE MATE requires almost no maintenance. It can be cleaned with a high-pressure washer or with soapy water and a brush.

THERMO

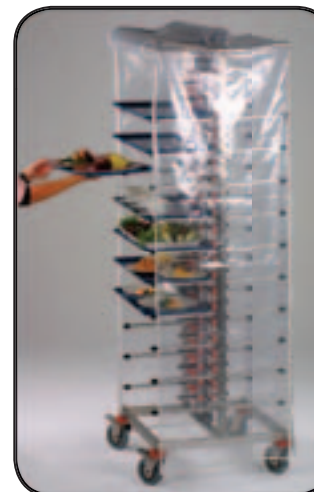

THE PM 84 STANDARD

The mobile trolley is the most popular among PLATE MATE users. Both the frame and the swivel wheels, two of which have a brake, are made of stainless steel. The overall height is 185 cm. You can store no fewer than 84 plates in 0.36 m². The PLATE MATE is also known as the 'waiter with 84 arms'. The trolley can easily be moved by one person and bumps and steps are no problem for the PLATE MATE. We are sure the PLATE MATE will save you a lot of time and money. A protective cover is available as an optional accessory to protect against odours and prevent the food from drying out.

THE PM 84 STANDARD WITH TRAY SUPPORT

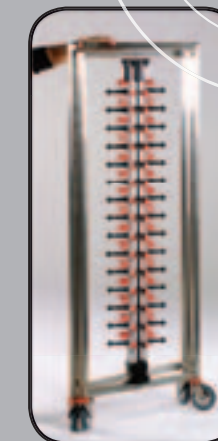

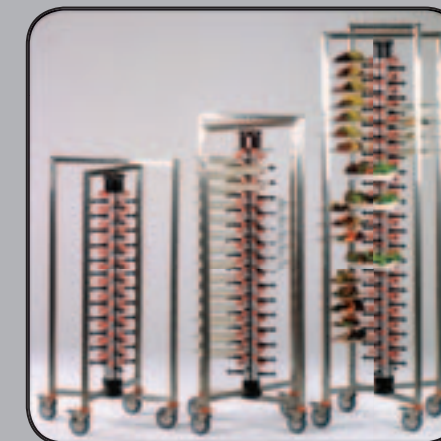

By fitting the PM 84 Standard with a set of tray supports, you can stack up to 20 large serving trays (at least 55 cm wide) in no time. This option means it is possible to use the trolley when clearing tables or to create extra storage near the dishwasher.

THE PM 84/78/60/48 COLLAPSIBLE

Save twice the space!

The only FOLD-UP plate rack in the world.

Only PLATE MATE makes the impossible possible. These four PLATE MATE models have been specially designed for rental companies, catering companies and companies where space is at a premium. These models can simply be folded up after use and hung on the wall or stored in a corner. All models have a stainless steel tube frame and swivel wheels, two of which have a brake. A protective cover is available for each collapsible model as an optional accessory to protect against odours and prevent the food from drying out.

The PLATE MATE COLLAPSIBLE is available in four models:

- PM 48 Collapsible: holds 48 plates, height 127 cm
- PM 60 Collapsible: holds 60 plates, height 149 cm
- PM 78 Collapsible: holds 78 plates, height 179 cm
- PM 84 Collapsible: holds 84 plates, height 189 cm
