Kitchenware

Breakfast

Adorn your table to your heart's content with Luminarc.

Luminarc invites you to try our collections of plates and glasses combining modernity and functionality.

Discover a rich palette of colours, styles and designs and with a resistance to dishwashing and daily wear and tear, you do not have to compromise on ease of use.

Everyday pleasure and user-friendliness without breaking the bank!

Luminarc:
Endless possibilities for your table!

During the manufacturing process, numerous tableware items (plates, dishes, bowls, cups and some glasses) go through a specific thermal treatment called tempering in order to guarantee a better mechanical and thermal resistance. Two to three times stronger (depending on the item) than most items of similar thickness, tempered Luminarc products are therefore able to withstand numerous shocks.

All Luminarc products which have the "microwave" logo are made from tempered glass which makes them more resistant to mechanical and thermal shocks, hence safe to use in the microwave.

All Luminarc tableware items withstand normal dishwasher use. The tests carried out at Arc International's laboratory ensure that the decorations of the plates as well as the sparkle of glasses can easily cope with the various attacks carried out by the dishwasher on a daily basis.

The majority of Luminarc products are made of glass. This is a non porous material in all of its forms (Opal, Zenix®, transparent or colored glass) and therefore doesn't retain any micro organisms which could lead to a bacterial contamination.

More and more Luminarc® decors are made with 0% lead and cadmium, the first collection with these features being Color Vibrance.

Stackable products to facilitate storage.

Thin rim for an improved tasting experience.

Leakproof and airtight.

Easy grip and anti-sliding thanks to silicone.
