DECANTER	78-79
THE RIEDEL HISTORY	80-82

RIEDEL Crystal is a 300 year-old family owned company known for the creation and development of varietal-specific stemware. RIEDEL Crystal was the first in history to recognize that the taste and aroma of a beverage is affected by the shape of the vessel from which it is consumed, and has been recognized for its revolutionary designs complementing alcoholic beverages and other drinks.

Founded in 1756 and pioneering varietal-specific stemware since 1958, RIEDEL has become the brand of choice for wine connoisseurs and drink specialists, hospitality professionals and consumers globally.

RIEDEL glassware is distributed worldwide and can be found at all good retailers and fine dining destinations.

10TH + 11TH GENERATION

Georg J. Riedel and Maximilian J. Riedel

RIEDEL GLASS KUFSTEIN, Austria 2010

The **RIEDEL TRADEMARK** dates from the Art Nouveau period at the end of the nineteenth century, and was used for RIEDEL glassware made in Bohemia from 1890 to 1925. In 1996, to commemorate RIEDEL'S 240th anniversary, we reintroduced this trademark for all our hand-made/hand-finished, products. The distinctive Riedel signature is now featured on the base of all hand-made/hand-finished products. This *Riedel* signature trademark helps our customers to distinguish immediately between hand-made/hand-finished products and those made by machine. Our machine-made products carry this **RIEDEL** trademark. The RIEDEL glass dynasty is built on the creative energies of a long line of glassmakers. The story begins in 1756 in Bohemia and continues right down to the united Europe of today, taking in some of the most dramatic events in European history along the way.

A **RIEDEL** glass turns a sip of wine into a celebration!

CAUTION: this is a grape varietal specific wine tool! This shape works best with wines made from specific grapes. Please read the instructions below to guarantee maximum enjoyment.

RIEDEL has researched the grape varietal sensation, leading to the conclusion, on which the world's wine experts agree; that the enjoyment of the aroma, taste, texture and finish of a wine, is maximized by using the right „**WINE TOOL**“.

ABOUT RIEDEL CRYSTAL

- RIEDEL CRYSTAL (established 1756) has been producing glass in the heart of Europe for over 260 years and eleven generations.
- Family owned and operated by GEORG J. RIEDEL (10th generation) and MAXIMILIAN J. RIEDEL (11th generation).
- RIEDEL is recognized worldwide for designing and producing the highest quality glasses and decanters for wine and spirit enjoyment. Top-rated wineries and restaurants throughout the world use RIEDEL. RIEDEL produces collections for every lifestyle and price range, whether for critical wine evaluation, a picnic or dinner. There is a series for every wine lover.

AT RIEDEL, CONTENT COMMANDS SHAPE

Wine friendly glassware delivers the aroma and the flavor of all aromatic beverages.

- In the late 1950's CLAUS RIEDEL was the first to develop and introduce wine friendly stemware.
- Wine friendly stemware translates the bouquet, taste, balance and finish of a wine to the senses.
- Based on this principal RIEDEL introduced the concept of grape-specific glassware.

WHY SHAPE MATTERS

- Stemware consists of 3 parts: the bowl, stem, and base.
- The height of the stem and the width of base are part of the glass design (known as the architecture).
- Grape varietal-specific stemware features finely-tuned glass bowls consisting of 3 variables: shape, size and rim diameter.
- Grape varietal-specific stemware has to translate the "message" of wine to the human senses.

There are **4** sensations in wine.

1. **Bouquet:** Grape varietal-specific stemware is responsible for delivering the quality and intensity of the wine's aroma.
2. **Texture:** Grape varietal-specific stemware highlights the exciting and diverse styles of „mouthfeel“ in wine (watery, creamy, silky, velvety).
3. **Taste:** Grape varietal-specific stemware creates a balanced interaction between the fruit, minerality, acidity and bitter components of a wine.
4. **Flavor:** Grape varietal-specific stemware offers a pleasant, seamless, harmonious, and long lasting aftertaste.

ARCHITECTURE OF STEMWARE

Is determined by three parts: Bowl – Stem – Base. The design (the architecture or construction) of a stemmed glass has to relate harmoniously in size, height and width.

The size of the bowl has to correspond and synchronize with the height of the stem and the width of the base. The relation of these measurements determines the seamless proportion of the three parts. Table top long term "classics" are composed by the magic "golden architectural formula".

Early glass architecture around 1920 took the lead, spear headed by three Viennese architects (Loos, Hoffmann, Ertl). Claus Riedel's designs from the late 1950's reestablished and took this concept further as well as influence from French and Irish classics; creating this eye pleasing "construction".

SERVING TO MAXIMIZE ENJOYMENT

- Glass hygiene: Serve beverages only in sparkling, clean, odorless glasses.
- Serving temperature: Do not over-chill white wines and sparkling wines, serve red wines below room temperature.
- Serving per glass: Maximum 3 to 5 oz/100 to 125 ml: Never overfill the glass.
- The ample, gracious glass volume offers great wines the room to breathe and to express their unique aroma message.

CARING FOR YOUR RIEDEL CRYSTAL

- ALL RIEDEL GLASSES ARE DISHWASHER SAFE!
- RIEDEL exclusively recommends Miele dishwashers.
- To avoid scratches: Avoid glass contact with other glass or metal. If available use a stemware rack.
- To avoid stains: Use soft water (low mineral content).
- To remove stains: Use white vinegar.
- If washing by hand, wash the glass under warm water (use detergent and rinse the glass carefully).
- Wash cleaning towels at boiling temperature (to kill bacteria) with odorless soap.

- Never use linen softener when rinsing your cleaning towels (to avoid grease film on surface).
- To polish the glass: Use two towels, never hold the glass by the base to polish the bowl as the stem could snap due to mishandling.
- Avoid storing glasses in kitchen cabinets next to items with a strong odour, as this can taint the glass and have an effect on the wine's aroma.

FINDING THE RIGHT RIEDEL GLASS

- RIEDEL offers both „varietal-specific“ glasses for true wine lovers and „wine friendly“ glasses for casual wine drinkers.
- Use stemmed glassware for fine dining and stemless for casual dining.
- Plan to invest (\$) as much for one glass as you spend on average for a bottle of wine.
- When you choose a grape varietal-specific RIEDEL glass, know it is built for a purpose and performs at its best with a specific type of wine.
- A grape varietal-specific RIEDEL glass is a wine tool; „the key to wine“ meant to unlock the most elusive characteristics.
- Visit our Wine Glass Guide on **RIEDEL.COM** to identify the right glass for your wine.

IS THERE ONE GLASS FOR ALL MY WINES?

The most versatile shapes for red and white wines are our RIEDEL OUVERTURE Doublemagnum and Magnum and the Riesling Grand Cru but remember, shape does matter for maximum intensity and total wine enjoyment.

ONE SIZE FITS ALL? HOW CAN EACH SHAPE PROVIDE A UNIQUE EXPERIENCE FOR MY WINE?

- One glass is not ideal for all styles of wines. A wine's bouquet, taste, balance and finish are all affected by the shape of the glass it is consumed from.
- A wine will display completely different characteristics when served in different glasses.
- These differences can be so great, that even experienced wine connoisseurs believe that they are tasting as many different wines as there are glasses.
- RIEDEL has created shapes that specifically enhance a wine's harmony and highlight its unique characteristics.
- Grape varietals carry unmistakable flavor profiles in their DNA, which add to the importance of selecting the appropriate glass.
- Wines have two, three or four flavor contributors which are associated with the fermentation.

Two flavor contributors: floral white wines – aroma and taste are dominated by fermented grape juice and the flavor of yeast.
RIESLING GRAND CRU (13-3/8oz, 380ccm)

Three flavor contributors: oak-aged white wines – aroma and taste are dominated by fermented grape juice, the flavor of yeast, and oak influence (malolactic fermentation, gentle wood flavors combined with aging and aeration).
MONTRACHET/CHARDONNAY (18-3/8oz, 520ccm)

Four flavor contributors: oak-aged red wines – aroma and taste are dominated by fermented grape juice, the flavor of yeast, maceration (fermentation of skin and juice) and oak influence (malolactic fermentation, gentle wood flavors combined with aging and aeration).
CABERNET (30-3/8oz, 860ccm)

WHY SHOULD I USE A DECANTER? HOW WILL DECANTING ENHANCE MY WINE EXPERIENCE?

- There are two reasons for which we decant wines:
 1. Decant older wine to separate it from its sediment.
 2. Decant younger wines to increase oxygenation, reveal more complexity, and open up aromas and flavors.
- To fully enjoy young wines (up to 10 years for both red and white) consider opening them 8–12 hours prior to consumption for oxidization or decant the wine as this shortens the aeration process.
- The main preserving element in wine is carbon dioxide which becomes part of the wine during the first (= alcoholic) fermentation.
- Decanting diminishes the amount of carbon dioxide and “matures” the wine, allowing the bouquet to develop faster.
- On the palate, decanted wine expresses higher levels of fruit in red wines and tends to integrate and smooth out tannins.
- When decanting young wines, turn the bottle directly into the decanter and let it splash into the vessel to promote oxygenation.
- When decanting off the sediment of an old wine, slowly pour the wine into the decanter without allowing any sediment to leave the bottle.
- Suggest the customer considers trying the following exercise: Using identical glasses, decant half the bottle and serve the other half directly from the bottle – then draw your own conclusion.

CHRISTIAN MOUEIX, PRESIDENT OF THE NÉGOCIAINT HOUSE ÉTABLISSEMENTS JEAN-PIERRE MOUEIX:

“I prefer to decant wines, both young and old. It is a sign of respect for old wines and a sign of confidence in young wines. Decanting old wines, just a few moments before they are served, helps to ensure that the wines’ clarity and brilliance are not obscured by any deposit that may have developed over time. Decanting young wines several hours before they are served gives the wine a chance to bloom and attain a stage of development that normally requires years of aging.”

HAND-MADE/HAND-FINISHED PRODUCT

The origin of blown glassware dates back 2000 years. The Romans were the first to use this technique. At RIEDEL, in Kufstein, we produce hand-made and hand-finished crystal glassware. Each hand-made and hand-finished item is individually crafted/hand-finished by our master glassmakers. The expertise of these craftsmen guarantees that the quality of each glass meets the high standard for which our brand is known. Because of the hand-crafting/hand-finishing, small tolerances in the size and weight of each glass, tiny bubbles/imperfections and slight surface variations are a feature and an acceptable part of the process.

Riedel Superleggero

FINE CRYSTAL

- SUPREMELY LIGHTWEIGHT,
ULTRATHIN CRYSTAL

RIEDEL SUPERLEGGERO (2015): Defined by its supremely lightweight, ultrathin crystal, the Superleggero Series is Riedel's groundbreaking innovation in the design of varietal-specific stemware, a category the Riedel family created. Executed in fine crystal.

Capacity: 290 ccm, 10-1/4 oz
Design: 2015

sommeliers black tie

FINE CRYSTAL

- SOPHISTICATED AND REFINED

SOMMELIERS BLACK TIE (2008) was launched in 2008 to celebrate the 50th anniversary of the iconic SOMMELIERS Burgundy Grand Cru glass. The Red Wine glasses are distinguished by a tall black stem and the White Wine glasses feature a black base, making this one of our most exciting collections.

sommeliers[®]

FINE CRYSTAL

- RIEDEL'S CLASSIC
- THE FIRST VARIETAL SPECIFIC STEMWARE LINE

SOMMELIERS (1973): The introduction of the SOMMELIERS series in 1973 achieved worldwide recognition. A glass was born that turns a sip into a celebration – a wine's best friend – fine-tuned to match the grape! We invite you to share this fascinating and unique experience. You don't need to be a wine writer, a wine maker or an expert to taste the difference that a RIEDEL glass can make.

4400/00 • BORDEAUX GRAND CRU

Height: 270 mm, 10-5/8 inch

CLAUSS J. RIEDEL, 9TH GENERATION

FATTO A MANO

by Friedel

FINE CRYSTAL

• COLOURFUL VENETIAN TRADITION

FATTO A MANO (2017): collection is a stunning range of varietal-specific wine glasses with colourful handmade stems using traditional Venetian techniques. With its hand-made stem and base, „Fatto a Mano“ combines the crafts of the past with today's technologically-advanced, machine blown techniques. The finished product charms the eye with its hand-crafted feel, colorful aesthetics and varietal specific bowls.

- SPECTACULAR AND GRACEFUL WITH THE OPTIC IMPACT

FATTO A MANO PERFORMANCE (2019): First presented in 2019 is a combination of two successful series and marries refined craftsmanship (for the stem and the base) and the precision of a machine (for the bowl). Riedel Fatto a Mano Performance consists of four parts and is produced in the factory in Kufstein. The glasses in this series are made of crystal glass and are dishwasher-safe. The variations are: black stem and transparent base, or transparent stem and black base.

GRAPE @ RIEDEL

FINE CRYSTAL • MACHINE-MADE

- ELEGANT AND HARMONIOUS

GRAPE (2006): A round, gentle egg-shaped bowls in conjunction with a pulled stem results in GRAPE, such an elegant and harmonious shape that it is a design classic. The seamless pulled stem combines a special design feature, which creates an indent on the bottom of the bowl, causing light to be reflected and adding another dimension to the lively color of wine.

FINE CRYSTAL • MACHINE-MADE

- DRAMATICALLY DESIGNED FOR NEW WORLD WINES

EXTREME (2018) was developed in sensory workshops by experts. Extreme glasses from Riedel are specially designed for the optimum enjoyment of wines. Executed in clear, brilliant crystal by Riedel in Bavaria Germany, Extreme perfectly shows the true colours and depths of the wine. Extreme glasses feature a broad, angled, Grape Varietal Specific bowl, which enhances the wines aromas, opening up the wine to reveal every subtle nuance. Extreme delivers the wine perfectly onto the palate, balancing and harmonising the fruit, acidity and tannins and highlighting the wines delicious flavours. Extreme by Riedel – the perfect essential wine accessory which turn every sip into a celebration!

FINE CRYSTAL • MACHINE-MADE

- OPTIC IMPACT

RIEDEL PERFORMANCE (2018): With three generations of research, development and experience in creating wine specific glassware Georg Riedel & Maximilian J. Riedel have created Performance; the ultimate loudspeaker for fine wine. Lightweight, durable and dishwasher safe, Performance glasses are executed in sparkling fine crystal, and feature long fine stems and large stable bases. Performance's unique optic impact not only adds a pleasing visual aspect to the bowl, but also increases the inner surface area, allowing the wine to open up and to fully show every aroma and subtlety. The grape varietal specific shapes in Performance, when combined with the optic impact, deliver ultimate wine enjoyment, making Performance the new essential 'must-have' wine glass collection for all wine-lovers.

FINE CRYSTAL • MACHINE-MADE

- RIEDEL'S BENCHMARK

VINUM (1986) Vinum became the first machine-made glass in history to be based on the characteristics of grape varietals. VINUM was not developed on a drawing board, but in tasting workshops, based on performance, where the content commands the shape. The pleasure of enjoying fine wine starts with the right glass.

VINUM is based exclusively on the characteristics of quality, reasonable pricing and wide distribution. VINUM has made a permanent impact on the globe's wine glass culture. These glasses have proved to consumers and restaurateurs that the pleasure of consuming wine starts with the glass. The Vinum collection, developed by Georg J. Riedel on the principle that the content commands the shape, is the „Vitrum-Vinothek“ for everyday use. VINUM covers 29 different shapes for wines, champagnes and spirits.

FINE CRYSTAL • MACHINE-MADE

- FOR SPIRITS SERVED NEAT

RIEDEL BAR (2008) Riedel Bar is composed of stylish and functional glasses designed to enhance the enjoyment of spirits. The series showcases the aromatics and flavor characteristics, while minimizing the bite of alcohol. RIEDEL adopts the same approach in developing spirits glasses as they do to refine their wine glass shapes. Tasters determine which forms show the most popular spirits and fortified wines to their greatest advantage on the nose and palate, without losing the carefully crafted nuances of distillation to the dominance of alcohol.

- FOR EVERY DAY WINE ENJOYMENT
THE ORIGINAL STEMLESS WINE
TUMBLER

O THE WINE TUMBLER (2004) is the first varietal specific wine tumbler in history. O is an innovative take on the casual wine glass, giving total wine enjoyment. O is based on the benchmark shapes of VINUM to enhance the world's most important grape varietals. The tumbler, used for centuries as an all-round drinking vessel, is now turned into a sophisticated wine accessory. Broken stems are a thing of the past.

- TRENDY URBAN BAR TUMBLER

TUMBLER COLLECTION (2018): The perfect 'must have' glasses for all cocktails and mixed drinks. With four different designs, inspired by the glamorous Art Nouveau period, these elegant, decorated crystal tumblers present a contrast to RIEDEL'S purist, unadorned wine glasses. Spirits and cocktail connoisseurs will enjoy discovering the versatility of these stylish, yet subtly nostalgic, glasses for the enjoyment of Whiskies, Gin and Tonic, Cocktails and mixed drinks alike.

- DRINK SPECIFIC
- PERFECTLY ADJUSTED FOR ICE CUBES

DRINK SPECIFIC GLASSWARE (2019): All drinks can be traced back to 7 Classics. The Old Fashioned, Manhattan, Daiquiri, Sour, Peasant, Buck and Julep. With the six different glasses you will be able to make thousands of drinks based off those original 7 Classics. Riedel added an all purpose glass and a mixing glass to the collection to complete the range.

Each glass created with specific attention to size, shape, volume and capacity for ice.

DECANTER
FINE CRYSTAL
HAND-MADE • MOUTH-BLOWN

"I prefer to decant wines, both young and old. It's a sign of respect for old wines and a sign of confidence in young wines. Decanting old wines, just a few moments before they are served, helps to ensure that the wines' clarity and brilliance are not obscured by any deposit that may have developed over time. Decanting young wines several hours before they are served gives the wine a chance to bloom and attain a stage of development that normally requires years of ageing."

The RIEDEL FAMILY has been in the glass business for 300 years, with 11 generations keeping the family business intact. The Riedel story begins in 1678 in the northern part of Bohemia – bordering Schlesia – today the Czech republic and Poland respectively. This part of Bohemia was a German speaking enclave known as the Sudetenland.

The Venetians brought back the knowledge of glass making from the Near East around 1000 A.D. The knowledge of producing glass spread slowly towards the northern part of Europe, searching for energy, critical to the melting of glass. Wood was the source, causing a glassmaker migration to the forests. Due to this migration, a glass culture developed in Bohemia in the 17th century.

The **FIRST RIEDEL** in the trade of luxury glass goods was Johann Christoph Riedel, born in 1678. He journeyed all over Europe trading glass, traveling as far as Spain and Portugal. The earnings from the business justified the arduous and dangerous travel. Johann Carl, **2ND GENERATION** (1701–1781) was a gilder and glasscutter. He operated his own workshop refining glassware.

Johann Leopold Riedel, **3RD GENERATION** (1726–1800), made his fortune in the Seven Years' War (1756–1763) fought between the Austrians and the Prussians over Bohemia and Schlesia. The demand

for window panes needed for rebuilding the surrounding cities and villages destroyed during the war provided Johann the chance to found his first glass factory, which he opened on May 17, 1756. His success was based on his invention of a technique that substituted stained glass windows with window panes.

The next generation, Anton Leopold, **4TH GENERATION** (1761–1821) radically changed his father's production from window panes to pure luxury goods such as chandelier parts and ornate glassware.

His son, Franz Xaver, **5TH GENERATION** (1786–1844) became a famous engraver in his youth. He signed his works of art, which are available at auctions even today. He later became an important entrepreneur, enjoying European demand for his goods. His main success derived from his addition of unknown colors to glass, using Uranium to produce the fluorescent colors, yellow and green, known in the literature as "Annagelb" and "Annagrün", which he named after his

daughter. Franz called upon his nephew Josef Riedel at the age of 14 to work in his company. Josef Riedel The Elder turned out to be an extremely talented person, becoming his uncle's assistant and ultimately inheriting the company.

Josef Riedel, **The Elder, 6TH GENERATION** (1816–1894) had great gifts, and the fact that that he was born in the time of the industrial revolution proved to be very much in his favor. He left the romantic traditional production places in the Bohemian forests where the glass was melted using furnaces heated by wood and settled in Poland. When the railway came in 1877, he imported coal, which was less expensive and more efficient than wood. The railway assured that the enormous amount of goods produced could travel quickly and safely to his customers. Josef employed 1,200 people at this time. His main production was colored glass beads and blanks (glass not shaped into finished form), which were cut and polished in small family workshops. The goods were ordered and sold through trading companies, reaching as far as India and South America. Distribution through the trading companies had a distinct disadvantage: the Riedel name never became a brand in the 19th century as the trading companies sold the goods under their own names.

The **7TH GENERATION**, Josef The Younger (1862–1924) was an outstanding chemist and mechanical engineer, creating a remarkable portfolio of 600 different glass colors. This sophisticated variety of colors set him apart from his competitors and enabled his business to develop further, unaffected by the Great War. Due to his development of new machinery, he specialized in the mass production of glass beads, which were used for jewelry and in combination with fabrics. In his cutting departments, he refined blanks with overlays of silver, gold, and color according to the fashion of the time. After 1890 he started to sign them with the Riedel logo, which was brought into use again in 1996.

The **8TH GENERATION**, Walter Riedel (1895–1974) suffered through two World Wars, which had a great impact on his destiny. He was forced to change his citizenship four times due to unfortunate political state of affairs. In 1918, Bohemia became part of the Czech Republic, with Walter Riedel and the German speaking Sudeten becoming Czech citizens. Around 1930 the political and economic conflict between the Sudeten and the Czechs turned violent, leading to the occupation of Czechoslovakia by the Nazi regime in 1938. At this time 70% of the total Czech glass production was dominated by the

Sudeten. In this time the Riedels emerged to the world as a leading manufacturer of perfume flacons and color overlaid gift items, chandeliers and chandelier parts. Walter Riedel inherited the mechanical genius of his father, developing extremely advanced mold techniques. Those products were then refined by cutting, being mounted onto metal and then wired for electricity. The war and the Nazis forced the industry to change from luxury goods to strategic war products. Walter Riedel and part of this team worked on picture tubes, part of the radar used for monitoring airspace. This was a unique technological achievement for that time, with Walter increasing the available diameter of the tube from 38 cm to 76 cm.

This invention became his destiny. When the Russian army conquered Berlin in 1945, they found an intact tube and were very eager to locate the scientist. In this era of Stalin, they forced Walter Riedel to sign a five year work contract and held him prisoner in Russia for 10 years. By the end of the Second World War in 1945, the Riedels' property and companies were confiscated and nationalized by the Czechs. The Riedels lost their home.

Walter Riedel moved to Austria in 1955. The Swarovskis, with whom the Riedels were very friendly, hosted Walter Riedel and offered him and his son, Claus J. Riedel, a new start in Kufstein, Austria, by reopening a glass factory, specializing in hand-made items, in 1956.

The **9TH GENERATION**, Claus J. Riedel (1925–2004) had a vision. He changed stemware from traditional colored and cut glass to plain, unadorned, thin blown, long stemmed wine glasses. He gained immediate recognition from sophisticated customers and museums. The many design awards signaled that a new era had begun. Museums bought pieces for their exhibitions, like the MOMA in New York, which today still has Riedel in their permanent collection. Based on his unique designs, Claus J. Riedel was the first person in history ever to recognize the effect of shapes on the perception of alcoholic beverages. His work has influenced and changed the appearance of stemware forever. His masterpiece, "Sommeliers", was introduced in Orvieto nearly 40 years ago, the first ever stemware line to be based on the character of wine.

10TH GENERATION, Georg J. Riedel, born 1949, joined the family business in 1973. Under his direction, the Riedel firm evolved into a globally operation company. Georg founded a network of Riedel-owned subsidiaries, starting in 1979 by opening Riedel USA and continuing the expansions to Canada in 1992, Germany 1996, Japan 2000 and UK 2001. In 2006 he founded Riedel Development, specializing in private label offers. In 2004, Georg bought the German-based companies Nachtmann and Spiegelau, operating the three brands (Riedel, Nachtmann, Spiegelau) under „Riedel Glas Works“, one of the largest producers of quality glass in Europe. Starting in 1987, with the support of winemaker friends like Angelo Gaja, Christian Moueix, Robert Mondavi and the endorsement of wine publications such as Robert Parker's The Wine Advocate, the Wine Spectator, Decanter Magazine and many others, Georg was fortunate to lift "his Riedel glasses" onto the tables of the wine world. Under his leadership, Riedel became the world's leading wine glass company.

11TH GENERATION, Maximilian J. Riedel, 11th generation CEO of Riedel, manages the Austrian glassware company based in Kufstein. In addition to his function as CEO of Tiroler Glashütte, he is also the multiple award winning head designer of the glassware company's decanters. When he was just 12 years old, Maximilian Riedel learned the family's traditional craft from his father, Georg J. Riedel. This training gave him the necessary insight into glassblowing and the know-how required to manage an international company. At the age of 18, he decided to pursue a career in the company instead of taking the conventional route of studying abroad. After completing his training at the Riedel headquarters in Austria, he introduced the brand to the Dubai market and then spent time at the French Riedel importer Ercuis in Paris, where he gained experience and knowledge that would benefit his own company. At the age of 23, he became the vice president of Riedel Crystal of America. As CEO of Riedel Crystal of America he more than quadrupled the company's sales figures in the US and Canada over the years, making North America the largest export market for Riedel. Maximilian recognised the significance of an online presence at a very early stage and, by initiating the Riedel webstore, created the enterprise's first online shop. Social media are also an important part of Riedel's marketing. They allow Maximilian to be in touch with consumers on a regular basis. Maximilian has been at the helm of Tiroler Glashütte and its international subsidiaries since 1 July 2013.
